- Web Data UNLOCKED Hackathon by BrightData

PROFESSIONAL SUMMARY

Full-stack Software Engineer specializing in custom business systems, API-first platforms, and AI-powered applications. Built eight reusable software foundations spanning retail, hospitality, HR, insurance, finance, and property management using Laravel, Next.js, Python, C#, and modern web technologies.

EXPERIENCE

Project Manager

Jul 2016 - Dec 2017

Docentron Pty. Ltd. • Jakarta, Indonesia

- Led development of educational browser games using Phaser.js.
- Mentored junior developers through multiple release cycles.
- Coordinated cross-functional feature planning with design and content teams.

PROJECTS

CommerceSystem

Designed a multi-frontend system (admin, POS, storefront) with transaction and inventory workflows, implementing a modular API-driven backend for scalability.

Laravel

Angular

Next.js

MySQL

HumanDesign

Built a system for generating complex analytical reports with structured backend computation and dynamic frontend visualization, including role-based workflows.

ASP.net Core

Angular

MySQL

QuotePlot AI Agent

Developed an AI-powered application for content analysis and structured output generation with API-based processing and responsive UI.

FastAPI

Next.js

UrusProperti

Implemented tenant, lease, and payment workflows with real-world data modeling and SPA admin interface.

Laravel

Inertia Vue

AlloyDB

Google Cloud

RestoSystem

Mar 2026 - Jul 2026

Built integrated POS and reservation system with multi-role interfaces and real-time workflows.

Laravel

Nuxt.js

AnalogJS

MySQL

Additional reusable foundations
Payroll, Insurance, Spa, and supporting business systems available in the portfolio.
